

**Codified Admit Diagnosis:
CV Surgery**

Codified Admit Orders

1. All providers entering admission orders will need to enter a Codified diagnosis for all Admit Orders, including powerplans, beginning on March 16th, 2016.
2. This is required for our new Bed Management (Capacity Management) software to appropriately place patients.
3. It will also be required by Admitting when they are communicating with payers.
4. Codified diagnoses will enable more timely and specific clinical decision support and help drive Clinical Pathways.
5. There will be a new **required** tab within the admission order which allows the ability to either, select an existing diagnosis or “quick search” and add new diagnoses.

Details for Admit to Inpatient Status

Diagnoses

Acute appendicitis (K35.80)

Appendicitis, acute (K35.80)
