Capacity Management – IP Physician Codified Admit

Codified Admit Orders

- All providers entering admission orders will need to enter a Codified diagnosis for all Admit Orders, including powerplans, beginning on March 16th, 2016.
- 2. This is required for our new Bed Management (Capacity Management) software to appropriately place patients.
- 3. It will also be required by Admitting when they are communicating with payers.
- 4. Codified diagnoses will enable more timely and specific clinical decision support and help drive Clinical Pathways.
- There will be a new *required* tab within the admission order which allows the ability to either, select an existing diagnosis or "quick search" and add new diagnoses.

6. These same diagnoses will be used with dynamic documentation and will flow to Assessment & Plan.

Codified Admit Orders (Cont.)

- 7. For Elective Surgical Admissions:
 - a. This does *NOT* replace or need to replicate specificity of procedure code.
 - b. The current "free text" diagnosis field/drop downs will be removed.
- 8. Using General Surgery as an example:
