

Create Note (Training Phase)- ED Physician Record and Teaching Note

ED Physician Record and Teaching Note is a hybrid FULL ED NOTE with a Teaching/Supervisory section. It will be used during the Training phase, only by Attending's, until they are transitioned to the *ED Physician Record* by Chris Cox. Use of the simpler *ED Teaching Physician Record* is available anytime.

After the Training Phase, this note will be used as a combined Resident and Attending Note, when patients are seen synchronously, and be used with the ED Physician Record note type.

*Type: ED Physician Record
