

PowerChart Progress Notes

Updates: Fishbone Labs

May 22, 2014

Tip #1: The Fishbone lab “look back time” has been set to **20 hours** from 12 hours.

This change is for all Note Templates that pull in Fishbones, except the RRT Note Template.

The time range indicates the date and time of the results displayed.

Tip #2: If Fishbones labs do not pull in to the Note Template you are using, insert fishbone labs using Dragon Commands or Auto-text.

Dragon Command	Auto-text	Description
Insert Fishbone 12 hours	.fishbone_12hrs	Pulls in labs within the last 12 hours
Insert Fishbone 20 hours	.fishbone_20hrs	Pulls in labs within the last 20 hours
Insert Fishbone Last	.fishbone_last	Pulls in the last labs resulted for the encounter

The formatting is left justified.

Highlight the fishbone labs and click the **Center** button on the Note Toolbar.

The screenshot shows the PowerChart Progress Note editor interface. The Note Toolbar is visible at the top, and the Center button is highlighted with a red box. The note content is displayed on the left, and the Lab Result section is on the right. The Lab Result section shows two time ranges: 03/25/14 12:58 to 03/25/14 12:58 and 04/22/14 12:32 to 04/22/14 12:32. The lab results are displayed in a list format, with values like 138, 115, 4, 110, 3.5, 26, 1.50, 10.0, and 20.0. The formatting is left justified.

The labs will then be formatted correctly.

The screenshot shows the PowerChart Progress Note editor interface. The Note Toolbar is visible at the top, and the Center button is highlighted with a red box. The note content is displayed on the left, and the Lab Result section is on the right. The Lab Result section shows two time ranges: 03/25/14 12:58 to 03/25/14 12:58 and 04/22/14 12:32 to 04/22/14 12:32. The lab results are displayed in a list format, with values like 138, 115, 4, 110, 3.5, 26, 1.50, 10.0, and 20.0. The formatting is now centered.
