

PowerChart Progress Notes

Tip Sheet: Tagging Microbiology Results

May 18, 2014

Issue: To tag Microbiology results for addition to your note, follow these steps.

1. After creating the note, click the **List** tab above the note.
2. On the list of Documents, locate the Microbiology report from which you wish to tag.

The screenshot shows the PowerChart interface. On the left, a table lists documents. A red box labeled '2' highlights the row for '04/16/2014 10:48 Progress Note with Med List'. On the right, the 'Preliminary Report' for 'Urine Culture' is displayed. A red box labeled '4' highlights the text '>100,000 cfu/mL Escherichia coli'. Another red box labeled '5' highlights the 'Tag' button. Below the report, a table lists antibiotics and their MIC and INTRP values.

Antibiotic	MIC	INTRP
Amikacin		S
Ampicillin		S
Ampicillin/sulbactam		I
Cefazolin		R
Cefepime		S
Ceftriaxone		R
Ciprofloxacin		R
Ertapenem		I
Gentamicin		I
Imipenem		S

3. The report will preview in the Pane View to the right.
4. Highlight the information you want to tag.
5. Release the mouse and click the **Tag** button that appears.
6. Click the **Progress Notes** tab above the List.
7. In the note, the tagged information appears on the left.

The screenshot shows the PowerChart interface. On the left, a 'Tagged Text' panel displays the text '> 100,000 cfu/mL Escherichia coli' with a red box around it. Below this, a 'Laboratory' tab is visible. On the right, the 'Progress Note' is displayed, showing sections for 'Subjective', 'Objective/Physical Exam', 'Assessment/Plan', and 'Hypertension'.

8. Click and drag the Tagged Text to the section of the note you want to document.
